

The Office of the Dean of Students will be conducting focus groups at various locations around campus (east and west). We want to hear from you and learn about which resources have been beneficial and your opinions on what resources should exist to support success at UIC. When you think about the resources UIC provides to students, what comes to mind? Are they resources about academics, transitioning to college, or accessing mental health services? Or are they about supporting student growth and career aspirations? What are your needs within your role at UIC? How can we modify our outreach efforts in order to make these resources more accessible to the UIC Community?

Whether you are a student, faculty, or staff, we want to know your thoughts and opinions about what has been a source of support and information.

Lunch will be provided. Limit 5 people per focus groups. Location will be based on which date is chosen. Please email crosal4@uic.edu if you are interested in participating and would like to learn about the location and dates.
